Components for Automotive, Energy, Appliance, Medical, Agriculture

**Wire Forming**
We use the latest CNC and other bending equipment to produce simple and complex designs.
- Small <> Large Diameter
- Complex Design Capability
- Tension Wires
- Stiker Wires
- Formed Listing/Fabric Wires
- Struous Wire
- Best Fit-Best Value

**Value-Added Assemblies**
Components sourced from multiple vendors can be converted to value-added sub-assemblies and single sourced through BGM.
- Robotic Mig Welding
- Robotic Spot/Resistance Welding
- Component Assembly
- In-House Capabilities /Global Sources
- Dedicated Work Cells

**Stamping**
Our metal stamping expertise added to your design phase can significantly reduce part costs.
- Metal Stampings
- Multi-side
- Brass/Stainless/High-Low Carbon
- Swaging/Piercing
- Secondary/Value Added
- Tapping/Threading

**Tube Fabrication**
Tube fabrication of different materials and for a variety of industries.
- Forming (CNC/Dedicated Press)
- End Forming/Upsetting
- Swaging
- Punching/Piercing
- Welding
- Assembly

**Components & Inserts**
Precision components of any shape out of virtually any alloy – processes include deburring, tapping, heat treating, plating and welding.
- Screw Machine
- Precision Machining
- Knurling/Roll Threading
- Injection/Insert Mold Products
- Over-Molding (Plastic/Rubber)

**Cold Upsetting**
To better serve our customers we have added cold upsetting capabilities to allow for more joining techniques.
- Cold Upsetting
- Single or multi-leg
- Small <> large diameter
- Assembly
- Swaging

**Lean Manufacturing - Just-In-Time Manufacturing**
Blue Grass Metals utilizes a visual factory management system designed to operate a lean manufacturing environment through the utilization of "Just-In-Time" production techniques. This system ensures that stock levels are better managed and supply response is quick and geared to meet actual demand fluctuations.

**Inventory To Support Your Operation**
The Blue Grass Metals 'Just-In-Time' delivery program allows customers to stop worrying about having the components they need for their operations. We are committed to having designated material in stock, and available for immediate delivery or shipping.
Quality, Price and Delivery

We strive to provide our customers' products with the highest quality, satisfying their requirements while exceeding their price and service expectations. Quality is built-in to every stage of the manufacturing process from material procurement to process flow to record keeping through delivery. It is our mission to build quality into the manufacturing process for repeatable, accurate results. We remain agile in our industry, able to react to new technologies, engineering improvements and new production techniques, keeping us ever vigilant to cost reductions and enhanced products.

Tooling & Design

Our staff is extremely knowledgeable and experienced when it comes to various methods of machine tooling. Blue Grass Metal's tooling and design services provide for close tolerance machining of various components we manufacture. Precision tooling begins with a solid design and customer interaction to make it work.

Our high level of customer service gives you the ability to be an important part of the tooling process.

Blue Grass Metal’s machine tooling and design services are aimed at providing the best machine tooling possible. We utilize state-of-the-art equipment and automation to achieve the highest level of quality and precision.

Global Alliances

Blue Grass Metals has cultivated proven resources and relationships with manufacturing partners all over the world. These relationships provide flexibility and diversity to Blue Grass Metals and its customers. Ensuring the right part, right price, on time every time.

Blue Grass Metals, Inc. has grown from 2,000 sq. ft. upon opening in 1990 to an 80,000 sq.ft. facility in 2015. We look to continue this solid growth by delivering on our customers' expectations on Quality, Price and Delivery.

Being strategically located allows us to better serve our diverse customers. Our clients cover a very broad customer base ranging from small shops to fortune 500 companies.

Markets Served:
- Automotive
- Energy
- Medical
- Appliance
- Agriculture
